DONOR AND RECEIVER APPLICATION

1 Introduction

The application DONOR AND RECEIVER connects the needy people and
the donor in a quicker way. The application aims at bringing the donors and
the recipients in close contact so that needy people can receive what exactly
they need easily. Currently the recipients have to sometime invest in money
to advertise that cause wastage of time and resources. This application will
help find material donors easily. Donors can register to know about the
urgent needs and donation location nearest to them. Charity Organizations
like churches and schools or any recognized group in need of a material can
also register and find donors in their specified area. It is software developed
for devices running on android platform version 4.2 and above where charities
can look for donors in their nearby area who will be available in quick time.
